

Live spotlessly.

A MORE ENLIGHTENED WAY TO WASH

From the pioneers of peerless food preservation and professionally-inspired cooking precision comes the final specialist of the luxury kitchen trifecta: Cove dishwashing. It is the culmination of years of research and refinement. We sought a more enlightened way to wash and exposed a higher standard of clean. Together with Sub-Zero and Wolf, you will find Cove in the world's finest kitchens.

The only dishwasher with
Sub-Zero and Wolf in its DNA.

CLEAN WITH ABSOLUTE CONFIDENCE

Cove is engineered to adapt to the dishes you clean most. Customizable interiors and adaptable wash and dry cycles ensure spotless and dry dishes—including large pots and pans, fine china and stemware, and tricky-to-clean whisks and utensils. No pre-rinsing is required and it is so quiet it will never interrupt the life of its owner.

COVE

CUSTOMIZE YOUR CLEAN

Whatever your life or cooking style, Cove gets your dishes clean. The Automatic cycle offers a superb all-around wash, while cycles like Pots/Pans or Crystal/China provide a specialized clean and dry.

ADJUSTABLE TINES AND RACKS

Wherever you see green inside a Cove dishwasher, there is an adjustment point. Rotate tines to cradle delicate dishware, or tilt the middle rack to fit tall tumblers above and large pans or trays below.

NOT JUST CLEAN—SANITIZED

Baby bottles, pacifiers, canning jars, cutting boards—Cove sanitizes them with its Sani Rinse option.

FAN-ASSISTED DRYING

Cove assures every dish and utensil emerges entirely dry, with no need to towel dry after the cycle is complete.

SILVERWARE RACK

Cutlery fits neatly organized in the upper silverware rack, ensuring a complete clean. A basket on the bottom rack holds larger utensils.

FOUR-STAGE FILTRATION

Cove's innovative filter design catches and removes food particles, ensuring only clean water passes back through the jets during subsequent washing and rinsing.

Customized clean—every time.

Designed to complete your kitchen *beautifully.*

Designers choose Sub-Zero and Wolf appliances because they integrate so effortlessly into a wide range of kitchen styles. Cove comes with the same level of design flexibility and integration, and coordinates perfectly with its Sub-Zero and Wolf kitchen companions.

MATCHING HANDLES AVAILABLE

Choose tubular or pro handle options from the Sub-Zero and Wolf line, or a custom handle that matches your kitchen.

SOLID DOOR CONSTRUCTION

The look is clean and sophisticated, with no visible screws or controls.

LIMITLESS PANEL OPTIONS

Choose a classic stainless steel panel accessory or apply a custom panel to match your cabinetry.

TOE KICK FLEXIBILITY AND TIGHT $\frac{1}{8}$ " REVEAL

Talk to your designer about these points—just two more ways Cove gives you a completely integrated look.

FLUSH INSET INSTALLATION

Cove dishwashers install flush to your cabinetry, maintaining the consistent, sleek lines of your kitchen.

The first 20-year dishwasher

The average dishwasher lasts about ten years, but Cove is designed and tested to last for decades of daily use. It is designed, built, and tested with the same premium-grade materials and in the same state-of-the-art USA facilities as Sub-Zero and Wolf.

FULL 5-YEAR WARRANTY

Cove comes with a full five-year warranty on all parts and service—and our unrivaled customer assistance for the life of the product.

PREMIUM CONSTRUCTION

Like its Sub-Zero and Wolf counterparts, Cove is made in our own USA facilities with a stainless-steel interior, powerful brushless DC motor, and leak protection system.

RIGOROUS TESTING

Built with premium-grade materials, Cove products are designed to last a minimum of 20 years. Major components are subjected to extreme stress tests prior to going into the final design, and every major function is tested before shipping.

FACTORY CERTIFIED SERVICE

We are confident that Cove will give you maintenance-free performance. But if it should ever need service, our factory certified technicians will deliver true "white glove" service and use only genuine Cove parts.

NEAR-SILENT OPERATION

Whether you are conversing with guests or helping your children with their homework, Cove will never interfere with tranquil, near-silent operation.

INCREASED INTERIOR VISIBILITY

Loading and locating dishes is so much easier with bright, long-lasting, and energy-efficient LED interior lighting.

SLEEK CONTROLS AND STATUS LIGHT

The controls are hidden under the countertop, and a status light shines down on the floor to maintain a clean, streamlined look.

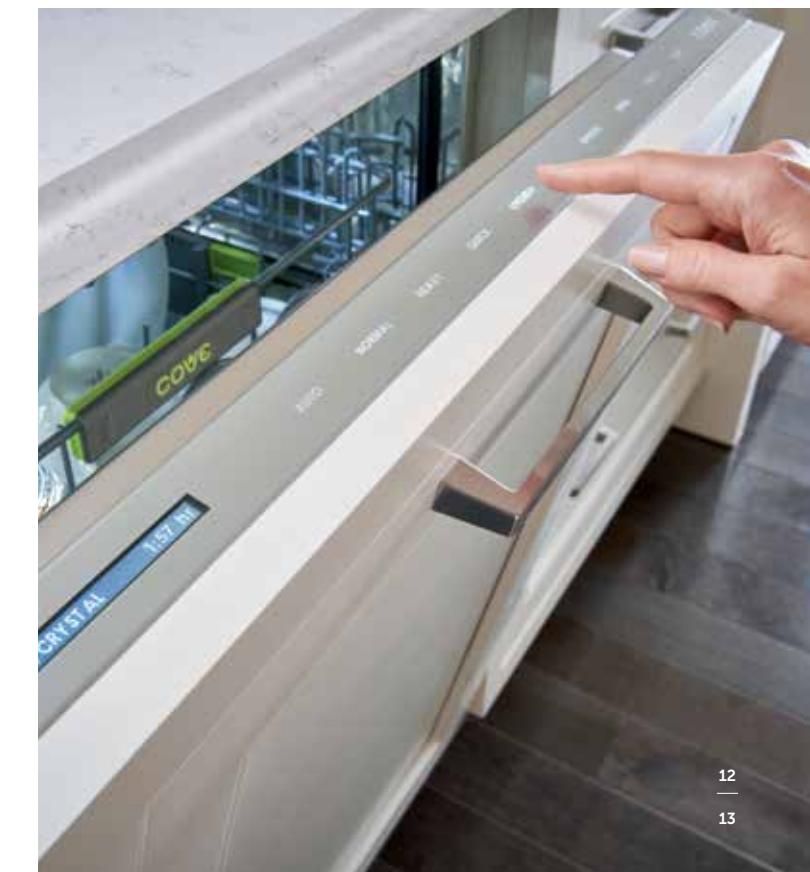

CUSTOM SETTINGS

User-friendly touch controls allow you to easily program your Cove dishwasher to clean dishes your way.

Thoughtfully designed for the life of its owner.

Cove dishwashers are so quiet, they will never interrupt a kitchen conversation. An Extra Quiet cycle option passes even the fussiest sleeping baby test. Bright interior lighting and easy-to-use controls are just some of the additional features that make Cove a pleasure to own and operate.

IT'S AN OPEN AND SHUT CASE:

Cove gets dishes cleaner.
